ABOUT ME

I'm a dedicated and adaptable person who enjoys solving problems and learning new things. I communicate clearly, stay organized, and always aim to deliver my best work whether I'm working alone or with a team. I'm motivated to grow, take on new challenges, and contribute positively wherever I work.

WORK EXPERIENCE

ACEDIA – Islamabad, Pakistan

Website: <https://acediadevs.com/> | Email address: contact@acediadevs.com

Link <https://www.youtube.com/watch?v=bxva1wKf99s>

Unreal Engine Developer

[08/12/2025 – Current]

- Developed gameplay systems using Unreal Engine 5 Blueprints, including ability systems, UI selection mechanics, and player interaction logic.
- Designed and implemented modular Blueprint architectures for scalable and reusable gameplay features.
- Built UI systems (UMG) with dynamic input handling, including scroll-based selection and visual feedback.
- Implemented movement systems such as mantling, vaulting, and spline-based actor movement.
- Optimized Blueprint performance and debugged gameplay systems for stability.

Intelgency IT Solution – Islamabad, Pakistan

Website: <https://intelgency.com/> | Email address: hr@intelgency.com

Junior Unreal Engine Developer

[15/01/2025 – 05/02/2026]

- Developed advanced enemy AI using Behavior Trees and Blackboards for smart, responsive combat behavior.
- Implemented robust multiplayer replication for AI and weapon systems to keep actions fully consistent across clients.
- Built optimized VR weapon systems with class-based spawning, reliable attachment handling, and replicated firing behavior.
- Designed scalable loadout systems with seamless data-driven transitions from selection menus into gameplay.
- Resolved complex replication and attachment issues to enhance stability and performance in multiplayer VR.

Freelance – Rawalpindi, Pakistan

Unreal Engine Developer

[01/05/2022 – Current]

- Developed a multiplayer parkour game with Steam session integration using Unreal Engine.
- Created custom gameplay systems, including motorbike controls, sword combat, and FPS mechanics.
- Implemented enemy AI using Behavior Trees for responsive and smart interactions.
- Built and published playable experiences and detailed environments in UEFN.
- Developed a drone simulation project with realistic movement and interaction systems.

EDUCATION AND TRAINING

Bachelor's in Game Design and Production

Riphah International University [16/03/2021 – 19/03/2025]

City: Islamabad | Country: Pakistan | Website: <https://riphah.edu.pk> | Final grade: 3.53

LANGUAGE SKILLS

Mother tongue(s): Urdu

Other language(s): English

SKILLS

Unreal Engine / Multiplayer & Replication / Blueprints Visual Scripting(Unreal Engine) / Unreal Engine Virtual Reality(VR) / Gameplay System / C++ Basic / Adobe PhotoShop / Adobe Illustrator / Figma / Blender

PROJECTS

[17/04/2025 – 30/12/2025]

VR Combat Framework Developed a VR multiplayer system with replicated weapon handling, class-based spawning, stable data sync, and Advanced Steam Sessions (wired + wireless).

[15/05/2024 – 10/09/2024]

VR Drone Developed a VR drone Controller which can destroy car and respawn the drone at different location.

[17/09/2024 – 12/12/2024]

Parkour Online The Built a multiplayer parkour game using Steam SDK with smooth session hosting, joining, and reliable online replication.

[01/12/2023 – 30/03/2024]

StrikeOps FPS Built an FPS game with core shooting systems, weapon functionality, and smooth player interaction.

[01/09/2023 – 30/11/2023]

Blade Duel Developed a standalone sword-combat game with polished melee mechanics, hit detection, and fluid combat interactions.

[16/06/2023 – 30/08/2023]

MotoX Ride The Created a motorbike game featuring custom vehicle physics and responsive, player-friendly handling description.
